I am an experienced **software engineer** specializing in front-end development with React. With a keen eye for detail and a passion for crafting intuitive user experiences, I excel in creating robust, scalable web applications.

Experience

Front-end Developer

Max Kelsen ~ July 2022 → Present

- Developed and implemented **front-end solutions using React**, creating intuitive user interfaces and enhancing user experiences for both web and mobile applications.
- Actively participated in **agile development methodologies**, engaging in daily stand-ups, sprint planning, and retrospective meetings to ensure efficient project delivery.
- **Led showcases and demos** of application features and functionality, effectively communicating complex technical concepts to both technical and non-technical stakeholders, resulting in increased understanding and engagement with the product.

Junior Software Developer

Speedwell ~ March 2021 → July 2022

- Leveraged **Drupal's robust content management capabilities** to create scalable and secure web solutions, facilitating efficient content updates and management for government clients.
- Ensured compliance with **government security and accessibility standards**, adhering to strict guidelines such as **WCAG 2.0/2.1 and Section 508**, to provide inclusive experiences for all users.
- Implemented **custom themes using PHP, Twig, TS and SCSS**, delivering visually appealing and responsive designs that aligned with government branding guidelines and enhanced user experiences.

Customer Service Officer

Services Australia ~ January 2021 → March 2021

- Served as a **frontline customer service officer** for a government agency, delivering exceptional support and assistance to citizens, addressing inquiries, resolving issues, and providing guidance on government programs and services.

Web Developer Internship

Sunflower Software ~ January 2020 → February 2020

- Collaborated with a team of developers as a web developer intern, utilizing **Angular and Spring Framework** to build and enhance web applications, contributing to the successful delivery of projects.

Academics

Bachelor of Information Technology, Computer Science Major

Queensland University of Technology ~ July 2017 → July 2021

- Developed a strong understanding of software architecture, networks, and data science, ensuring the ability to address complex technological challenges.
